A Completely Integrated Software Solution
for Every Type of Landscape Company.

dynascape.com

Business management software built **specifically** for the landscape industry.

DynaScape Manage360 is a single, comprehensive software system that handles every aspect of project management for your landscape business, from initial sales contact to final invoice. This web-based platform unifies your team's work, automates daily tasks, and provides data insights to improve your profitability and customer outcomes.

Manage360 is like having an on-demand business consultant to keep you on top of every aspect of your operations. The success of your business depends on it.

Software to manage every aspect of your landscape construction and maintenance business.

One Integrated System

Every project, estimate, and invoice in one place.

Access Online

Available anywhere, anytime, on any internet-connected device.

Easy to Use

Powerful functionality in an intuitive, logical interface.

Transform your landscape business.

Focus on your most promising leads

- » Manage your entire sales pipeline
- » Identify bottlenecks and make adjustments to your sales process
- » Analyze closing rates to improve performance, and focus on your best opportunities

Run your jobs more efficiently

- » Produce detailed material lists so your crews know what is needed
- » Automatically generate purchase orders
- » Make adjustments to the estimate with a flexible change order process
- » Crews can easily track their time, materials, and equipment using our mobile app

Transform your business

- » Evolve your business with best practices and reports that provide the insights you need to run a successful landscape company
- » Use job cost reports to improve your estimating and address production issues
- » Automated billing for efficiency and accuracy

Build more profitable, consistent and competitive estimates

- » Account for all direct costs for each job
- » Use your choice of several industry-leading methods for recovering overhead
- » Build all quotes on a consistent central price list

Everything you need to manage your landscape business.

- ✓ Full lead and customer management
- ✓ Import your own costbook
- ✓ Cost-based estimating for landscape construction and maintenance
- ✓ Build repeatable services for maintenance contracts
- ✓ Create kits using your own production rates
- ✓ Organize your landscape construction estimate with Work Areas
- ✓ Crew Tracking Mobile App
- ✓ Chart the optimal route for your maintenance crews using Google's Premium Maps service
- ✓ Schedule your work with full calendar views
- ✓ Billing management
- ✓ Integration with Quickbooks

The sooner you implement it [Manage360], the more profitable you're going to be as you grow... The earlier on you can do it, the better it's going to make your company long-term.

Jarod Hynson Owner, Earth, Turf, and Wood Inc.

Mobile Crew Tracking App

Track Time & Materials

Gone are the days of printing out paper timesheets, work orders, and route lists! Going paperless saves your crew valuable time and gives you full transparency into their daily progress.

Editable clock in & out times

- » It happens, the crew gets busy and forgets to clock in or out.

Make crew roster changes

- » The crew leader can adjust who is on their crew at any point during the day.

Track time & materials

- » For precise job costing the crew can track their time, materials, and equipment!

Enhance crew communication

- » Leave notes for the crew to keep them in the loop and they can do the same for you.

Track crew via GPS stamp

- » Always know where your crews are when they clock in and out.

Grouped maintenance visits

- » Clock in to several sites in the same area and we'll distribute the actual time based on what's been estimated.

Employee task summaries

- » Before submitting their timesheet for the day, the crew leader can see what everyone did for the day.

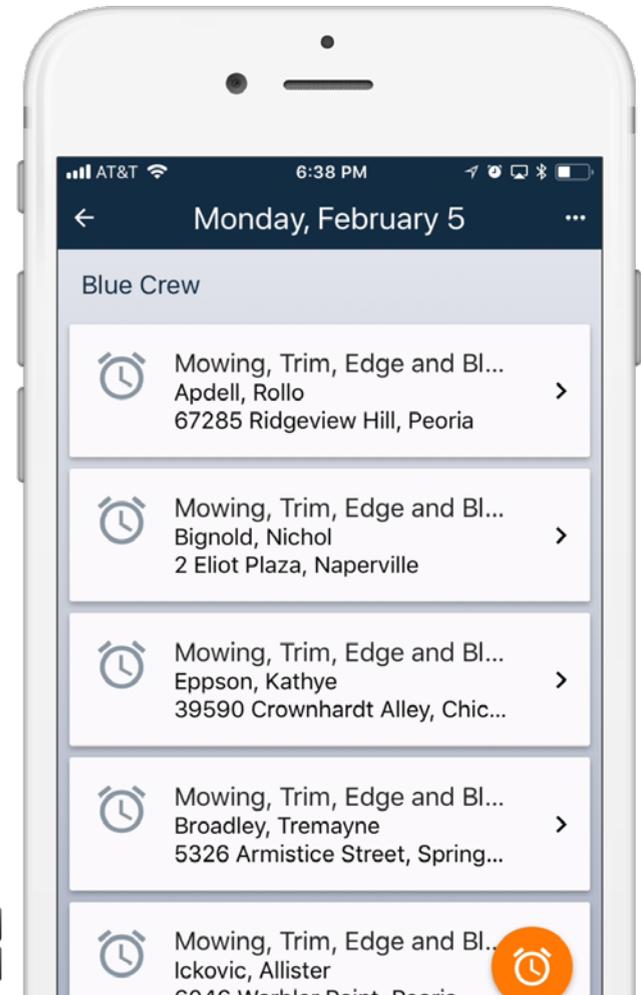

Express clock out

- » When you clock in to a job site the app will automatically clock you out of the last jobsite you were at.

Offline functionality

- » Whether the phone was accidentally switched to airplane mode or there crew entered a dead zone the app will always function!

Also available in Spanish!

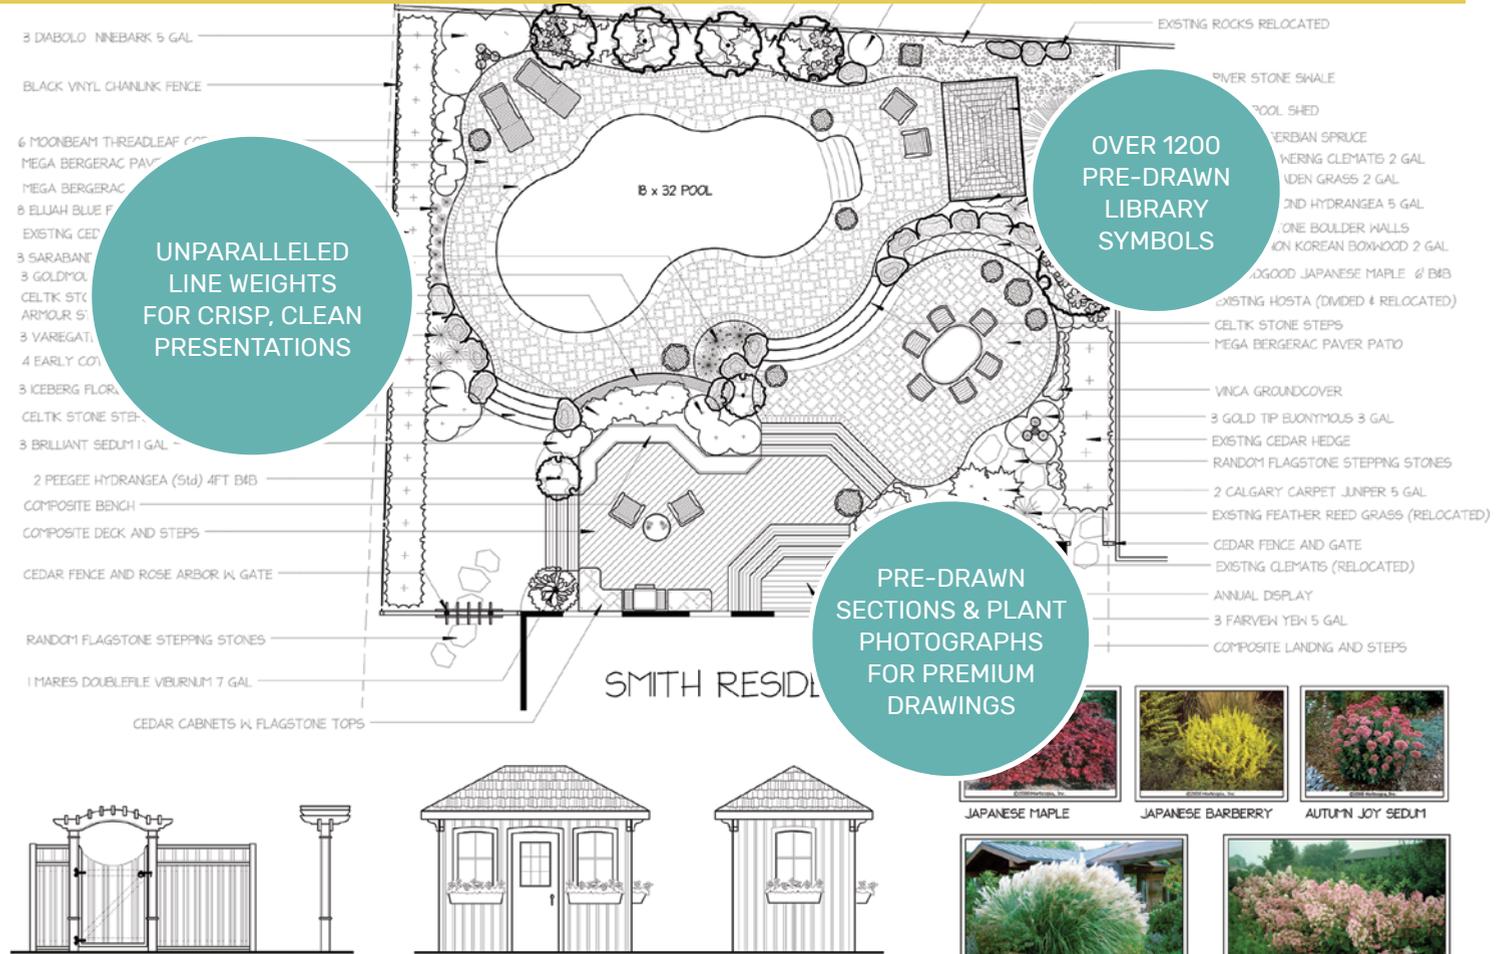

Unlimited File, Photo & Video Storage

Store an unlimited number of photos, documents, and videos with manage360's new file storage feature.

Reschedule Unfinished Work

Crew leaders can easily reschedule any work they weren't able to get to, ensuring that every job gets done. We've made it easy to move a job or visit to the next day.

Large Plant Database

Online database filled with Hortiopia® content for plant photos and cultural info.

Pre-Built Styles

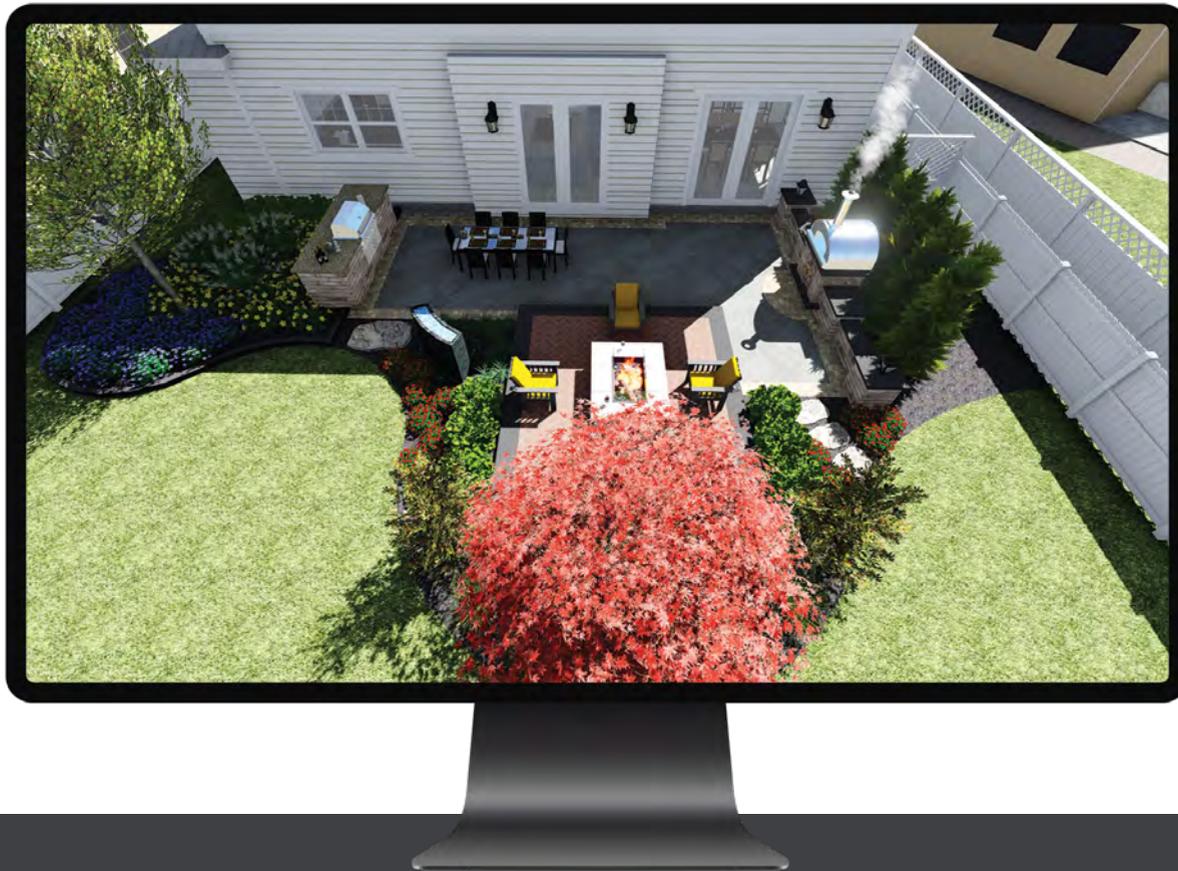

Choose from three unique rendering styles with hundreds of swatches or create your own.

Stunning Effects

Easily add shadows and transparency to communicate your design's true appearance.

Improve your sales closing ratio by offering 3D presentations!

Fast CAD Clean Up

Sketch3D repairs the imported CAD geometry to allow you to start 3D modeling right away.

Component Libraries

Choose from more than 1,400 pre-built landscape items to add to your 3D model.

Texture Libraries

Sketch3D also includes libraries of landscape textures for the various surfaces of your 3D models.

Gain the **competitive edge** and win more sales!

Sketch3D by DynaScape is a powerful add-on program that transforms SketchUp into the essential landscape modeling tool.

With it, you can:

- » Quickly replace 2D symbols with 3D components
- » Easily create scenes from any angle
- » Export your model as pictures or videos

Visit the Sketch3D site to try free samples:

Best-in-Class

SketchUp is best-in-class software for 3D modeling of any kind. And Sketch3D makes SketchUp landscape-specific!

Invest in Professionalism & Productivity

You're not just investing in software. You're investing in significantly bolstering the level of presentations you put in front of your clients, and equally important, investing in enhancing the productivity of landscape architects and landscape designers.

Design + Color run natively on Windows. 	Landscape-specific CAD and 3Dcomponent warehouse (an add-on for SketchUp). Design runs natively on Windows. 

About Our Subscription

The subscription is required to maintain your license. We see the subscription model as the key to keeping both our software and our customers current and competitive. It's a win-win arrangement as it ensures not only the continued health and currency of your software tools, but also, our ability to keep those tools at the cutting edge of technology.

Required Subscription Includes:

- » Maintenance of license
- » Unlimited access to technical support
- » All updates and upgrades
- » Online plant database (Design)
- » Component warehouse (Sketch3D)
- » Webinars, articles, white papers

Vast resources available to the DynaScape community!

Training Videos

One of the greatest resources to help you understand how Design works. Our recommendation is to start by watching the videos on one screen and follow along on another.

Knowledge Base

Browse our library of step-by-step how-to articles and guides to get quick answers to use your DynaScape software.

DS | Design Manual

The full manual for Design in PDF format. We show you how to use every aspect of Design in meticulous detail.

DynaScape Blog

Loaded with recorded webinars, articles, and videos relevant to using the software and to your business.

My Account Page

All DynaScape clients get a personal page on our website to manage your account. There you can deactivate computers using your Design licenses, access Design and Color training videos, update your credit card information, and access all of your payments.

World Class Client Services Team

DynaScape Software's Client Service Team provides unparalleled technical support to thousands of clients in a highly professional fashion. All Client Services Team members work in our office every day. They are the same product experts that test any new features, enhancements, and fixes ensuring they meet their high standards.

Online Training

Also available to you is an extensive offering of live online training classes for purchase. Design, Color, and SketchUp classes are regularly offered.

DynaScape Software has been providing technology solutions to the landscape industry since 1998. Now used by over 4,000 businesses and over 100 colleges and universities across North America, DynaScape has emerged as the industry leader in quality software for the landscape professional.
